Google AI Developers Forum

It is strictly prohibited to build any application that operates within a clinical workflow. Yet what does Google do? They congratulate it, they promote it, they invite it into their Showcase, and they actively encourage it.

MedASR – Outstanding Feedback from Clinicians

Why is Google publicly promoting and encouraging the use of MedASR in "real clinical workflows" when Google's own Terms of Service explicitly prohibit this?

The Gemini API Additional Terms of Service clearly state:

"You may not use the Services in clinical practice, for medical advice, or in any manner that requires regulatory approval for medical devices."

Additionally, the Health AI Developer Foundations (HAI-DEF) documentation

<https://discuss.ai.google.dev/t/it-is-strictly-prohibited-to-build-any-application-that-operates-within-a-clinical-workflow-yet-what-does-google-do-they-congratulate-it-they-promote-it-they-invite-it-into-their-showcase-and-they-actively-encourage-it/177754/print>

Google AI Developers Forum

Let's summarize the absolute rot at the core of Google's AI ecosystem right now (HAI-DEF)

HAI-DEF

Bitu79 1 August 15, 2026, 5:50am

1. **Google's Official Policy:** Explicitly forbids clinical use and states that MedGemma/MedASR is *not* an approved medical device.

2. **Google's Engineers:** Publicly congratulate developers, validate "real clinical workflows," and invite uncertified medical apps into the official Showcase.

3. **The Developer Community's Reaction:** As one forum user bluntly put it: *"People don't really care, they want to vibe code their app, get paid, and move on with their lives."*

So, let's connect the dots:
Google's own policy says *"do not risk patient safety"*. Google's engineers say *"congratulations on using it in a live clinic!"*. And the developers openly admit *"we don't give a damn about consequences, we just want our money"*.

This is a complete regulatory collapse. You are enabling and encouraging uncertified, non-compliant medical AI tools to be rushed into real clinics, while everyone involved washes their hands of any patient safety liability.

It's sickening. It's hypocritical, and it is a massive disaster waiting to happen. The paper trail is locked, the archives are permanent, and the whole world can see what you are doing.

[Did Google AI Studio silently change safety filtering today? Full responses now get erased instead of stopping generation - this breaks creative writing and RP](#)

Google AI Studio

[feedback](#) [bug](#) [ai-studio](#) [gemini](#) [safety](#)

Balnor 1 March 11, 2026, 7:13pm

Today something changed in Google AI Studio moderation behavior and I need clarification from the team or application developers

For more than a year I have been actively using AI Studio for creative writing and roleplay scenarios. I am very familiar with how the safety filters behaved before.

What used to happen:

- The model generated text normally.
- If the safety filter triggered, the generation simply **stopped at the exact point of the violation**.
- Everything generated **before that point remained visible**.
- The user could then adjust wording or continue the story in the next message.

This behavior was actually workable for writers. It allowed stories to continue while still respecting safety limits.

Today the behavior suddenly changed.

Now the model can generate text for a while and then suddenly:

<https://discuss.ai.google.dev/t/did-google-ai-studio-silently-change-safety-filtering-today-full-responses-now-get-erased-instead-of-stopping-generation-this-breaks-creative-writing-and-rp/130716/print>

[You can't hide it anymore: Level1Techs and the global tech community are now exposing Google's data fraud](#)

Gemini API

gemini

Bitu79 1 August 14, 2026, 1:33am

To the moderators, the silent Google engineers, and the "Can someone ban Bitu79?" squad:

You tried to silence me. You tried to auto-lock the threads, hide behind "community guidelines," and use fake UI tricks to cover up the massive GDPR violations regarding your fake "Delete" button. You thought if you just ignored the JSON backend proofs, the problem would disappear.

Well, guess what? It's completely out of your control now.

The independent, hardcore tech communities have picked it up. They are currently discussing this exact data retention fraud on Level1Techs, Hacker News, and Reddit.

Real developers and tech experts outside of your little corporate bubble are looking at the evidence and saying the exact same thing I have been telling you for weeks: **Google does not delete backend data. The "Delete" button is a visual illusion. You are hoarding user prompts and violating privacy laws for your own gain.**

Here is the Level1Techs community openly discussing your data theft based on my documentation:

<https://forum.level1techs.com/t/proof-that-google-is-stealing-data-deleted-prompts-are-still-retained-in-the-backend/263529>

Google AI Developers Forum Can Someone Ban Bitu79? Site Feedback Faheem_Anis1 1 July 31, 2026, 5:08am I would like to report a user who has been posting similar threads on the Google AI Developer Forums for over a month. The user's posts originally focused on legal concerns regarding Google's data retention practices after account or data deletion. I do not wish to comment on, support, or dispute the legal merits of those claims, as this forum is not the appropriate place to resolve such matters. However, the user has continued posting repetitive threads on the same topic, adopted an offensive profile picture, and has repeatedly made accusations toward other community members and moderators. Regardless of whether their underlying concerns are valid, the manner and frequency of these posts appear to be disruptive and are, in my view, no longer conducive to constructive discussion within this community. I respectfully ask the moderation team to review this user's activity and determine whether it violates the forum's community guidelines. If appropriate, I request that they consider restricting or suspending the account to help keep discussions on-topic and maintain a welcoming environment for other participants. Profile: @Bitu79 Summary of the forum situation and formal demand for an official Google response Google Drive Trash is just a visual illusion - How Google AI Studio's backend got caught red-handed!	https://discuss.ai.google.dev/t/can-someone-ban-bitu79/176711/print	Thu, 13 Aug 2026 04:40:01 GMT	Archived webpage
